paradis^{diguit}

my conception for a perfect guitar went beyond brilliant acoustics: it should look truly beautiful and be a pleasure to touch. thus i aimed for a distinctive design matching the high quality of materials and workmanship and suggesting by its very look the innovative features built into it. the look is a promise of what can only be heard.

6 highly sensitive piezo pickups

slide-controls for volume,
polybass and free assignable
functions

switches for program-presets

dropped-D-extension

nylon-string version

removeable headcaps

NATURAL
basic standard

- natural acoustic sound
- individual string gain control for perfect balance
- polybass suboctave processing
- automatic power off/on

MIDI
optional module 13R

- connectivity to guitar-midi-devices such as Axon or Roland

FireWire
optional module FW

- direct connection to computers
- low-latency, real-time processing
- runs standard audio-programs
- PolySonic multichannel plugin by Mathons
- stereo headphones/monitor out
